

As a concerned citizen, I want to encourage you to not allow LPFM to walk all over existing FM translators. I and hundreds of thousands of people listen to KLOVE and AIR1; Sent from California. It is so refreshing to support (yes these stations are fully funded by the listeners- there are no commercials). These stations offer truth in a world of confusion, and help me through each day with biblical truths and music that no one else in the area does. It would be a very unfortunate thing to have another station and format to replace these. If LPFM is given this proposed priority over FM translator service, there is a very good chance that Christians and others seeking the truth about God, Life and purpose to help them through the day will have nowhere to go for this wonderful music to be heard on the radio. People in the world need stations on FM translators left alone. They cost much less than the mainstream FM, and this allows people to hear good music without trash and commercials taking up half the broadcasting. Translator stations may not be important to some at the FCC, But are to the common people. Surely there is room for all!
